HVAC Nitrogen Purging Regulator

– The **EASIEST** way to install line sets –

WESTERN

a Scott Fetzer company

Global Gas Management Technology

Enterprises | Innovator | Medica | Westwinds

NEW

VN-650

650 PSI test pressure

VN-500

500 PSI test pressure

VN-250

250 PSI test pressure

- Preset Purge (25-35 CFH), Braze (3-6 CFH) and Pressure Test (650 PSI, 500 PSI or 250 PSI) Settings
- Regulator and Flowmeter in ONE
- Hand-tight Cylinder Connection

Why Use Nitrogen when Brazing HVAC Line Sets?

Nitrogen purge is an often overlooked, but critical step in 410a installations. The nitrogen displaces oxygen in the lines and minimizes formation of oxides which can dislodge and get trapped in the TXV or metering orifice, causing premature compression failure.

Copper tubing brazed with nitrogen purge.

Copper tubing brazed without nitrogen purge.
*Notice the black oxide deposits.
